

JMS Senior Living owns and operates skilled nursing throughout Missouri, providing skilled nursing services to individuals requiring care ranging from short-term rehabilitation to long term care, respite and hospice.

Rehabilitation Services

Our rehabilitative care team serves a wide variety of people including those recovering from a debilitating illness to those recovering from a surgery or joint replacement. We have partnered with Select Rehab to provide our rehabilitative services. Select Rehab offers physical therapy, occupational therapy and speech therapy. Our in-house therapists are able to see the same residents each session. This allows them to build a strong trusting relationship with our residents to customize their rehabilitation and improve outcomes. They provide rehabilitation 5-7 days per week, maximizing independence and safe mobility to help them reach their highest potential while ultimately improving their quality of life.

Skilled Nursing Services

We provide 24 hr. skilled nursing care as well as hospice and respite care. Our residents are under the care of our skilled nursing staff and are closely monitored under the care of partner physicians. The physicians visit routinely and often utilize support staff to enhance their services in our home. The physicians dictate our resident care and collaborate with our team to provide care that is individualized to meet the needs of each of our residents.

Payment

We accept the following payor types:

Private Pay
Medicare
Medicaid
United Healthcare
AARP/Medicare Complete
Long-term care insurance

We will be happy to contact any insurance provider you have and discuss your coverage available for our facility.
